

Tekst mixing console Tango Extremo – STS Digital 6111136

Tango Extremo is really an extremo recording, if I may use the title from the LP in this way. First of all it is live and it has an extreme dynamic range.

Fast and furious it sounds, more than live I would say.

That makes this album a must have for everybody who loves great music and of course very exciting recordings. From the UK was used the 8 channel Audio Developments mixer AD 255 and from the US the 88.2-24bit, 24 channel Alesis.

Siltech microphone cables and interlinks were used throughout the recording.

A single Schoeps MK21 on the bass, two Schoeps MK21 on the piano, one Schoeps MK21 on the violin and one Schoeps MK21 on the saxophone and accordion. For ambiance two LCM-3 microphones designed by a Dutch company Mazerier Electronics were used.

The recording of this LP was possible due to a contribution from Hans Kortenbach, manufacturer of Musical Affairs loudspeakers, Cees Ruijtenberg, manufacturer of Metrum Acoustics DA convertors and headphone amplifiers and Frens Mazerier by providing his microphones .

We hope that this LP album will soon become an icon on every high end analogue turntable.

Don't let yourself be put off knowing this is a digital recording, just give it a chance.

I like it very much, I hope you will like it too.

Balance engineer

Fritz de With - STS Digital.

With the greatest pleasure I herewith would like to present to you our first LP, our first vinyl! After ten years of Tango Extremo and after producing seven cd's with this group I am very proud to have been able to produce an LP with live recordings of a memorable concert we did in 2013 in Theater De Speeldoos in Baarn, The Netherlands. I hope you will enjoy it and look forward to meeting you during one of our concerts somewhere in the world. Special thanks to Fritz de With for all his help and expertise to produce this wonderful album!
